EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with Carol Druzbeck on 3/3/2010.
3. The application has been amended as follows:
4. Please **REPLACE** claim 1 with:
An iris recognition camera, comprising:

a driving barrel configured to support a single alignment of at least two lenses configured to serve as a wide-angle lens at all times, wherein the at least two lenses are respectively fixed to a predetermined position of the driving barrel so that intervals between all lenses in the single alignment of the at least two lenses are immutable;

a moving device comprising a single drive motor configured to reciprocatingly move the driving barrel to perform both focus and zoom operations at the same time;

and

a position sensor attached to a casing of the iris recognition camera that is configured to detect a position of the driving barrel within the camera and configured to detect a user of the iris recognition camera.

5. Please **REPLACE** claim 20 with:

A method of operation for an iris recognition camera, comprising:

detecting a user;

moving via a moving device comprising a single drive motor a camera lens of the iris recognition camera to an initial position detected by a position sensor, that is attached to a casing of the iris recognition camera, after the position sensor detects the user;

thereafter reciprocatingly moving via the moving device comprising the single drive motor the camera lens to perform both focus and zoom operations from the initial position to an image pickup location where a user's iris can be captured, wherein the camera lens includes at least two lenses which are fixed respectively to a predetermined position of a driving barrel so that intervals of all lenses of the at least two lenses are immutable; and

performing the image pickup using an image pickup device.

6. END EXAMINERS AMENDMENT

Allowable Subject Matter

7. The following is an examiner's statement of reasons for allowance:

8. With respect to **claims 1 and 20** the prior art discloses an iris recognition camera and method comprising a driving barrel with lenses configured to serve as wide-angle lenses at all times, wherein the lenses are driven to a predetermined position for iris recognition when a user is detected and where position sensors detect the use and detect the position of the lenses in the driving barrel.
9. However, the prior art does not teach or fairly suggest where the camera and method as disclosed in the prior art comprises a single position sensor as claimed that is attached to a casing and configured to detect both the user and the position of the lenses in the driving barrel.
10. **Claims 2-4, 6-12 and 22-25** are allowable for at least the reasons that they depend from claim 1 or 20 which is allowable for the reasons discussed above.
11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
